## INTRODUCTION

## eSchool User's Guide

We are glad to announce e-School (School Management System), a Web based application to handle the entire school system. During the implementation of e-School as a full ERP for school administration and interaction, we strongly realized the need of a simple yet effective version of e-School, which should preferably run on MS SQL server without losing the scalability, flexibility and its core strength of user friendliness with strong security of your valued database.

e-School is a powerful, fully Web based School Management System that is easy to use, fast to implement and effective to mobilize the school management system in a great way.

### GETTING STARTED

To start working with School Management System software, user has to type following URL (Uniform Resource Locator) on the browser's Address bar –

<http://localhost/eschool/LoginHome/login.aspx> as shown in figure 1.

**Figure 1**

Now user has to select user type (Administrator, Teacher, Staff...) and then enter Login Name and Password to Login into the Software. After entering correct User Name and Password, Main Screen appears as shown in figure 2.
